SUMMARY

Motivated Information Technology student with strong problem-solving skills and experience building scalable software applications. Quick learner with hands-on experience in modern technologies, collaborative development, and real-world project execution. Seeking opportunities to contribute technical and analytical skills in a growth-oriented environment.

SKILLS

Programming: Python, Java, SQL, HTML, CSS, JavaScript

AI/ML: PyTorch, Gemini AI, Sentence Transformers, NLP

Dev Tools: Git, GitHub, SQLAlchemy, Matplotlib

Frameworks/Tools: Node.js, FastAPI, Docker, MySQL, Hyperledger Fabric

Cybersecurity Tools: Aircrack-ng, Kismet, Kali Linux

Soft Skills: Communication, Teamwork, Time Management

EDUCATION

B.Tech – Information Technology
PSG College of Technology, Coimbatore

Expected May 2027
CGPA: 7.65 / 10

Higher Secondary
Vivekananda Matric Hr Sec School, Vaikundapuram

Apr 2023
Score: 90%

PROJECTS

AI-Powered Enterprise Project Orchestration Platform

- Developed a full-stack AI-driven platform to automate SDLC planning, project estimation, and risk assessment workflows.
- Integrated LLM/NLP-based requirement analysis, automated roadmap generation, and AI-assisted project visualization.
- Implemented backend APIs, authentication, dynamic pricing logic, and automated reporting with SQL database integration.
- Tech stack: Python, FastAPI, React.js, SQL, Docker, Gemini AI, Sentence Transformers, Matplotlib, Git/GitHub

AI Chatbot with Authentication

- Developed chatbot supporting login, JWT authentication, and OTP password reset.
- Handled unanswered queries and enabled dynamic retraining workflow.
- Built backend APIs using FastAPI with MySQL database integration.
- Tech stack: HTML, CSS, JavaScript, Python (FastAPI), MySQL

Auto Hotspot Audit and Risk Assessment System

- Developed a wireless network auditing system to detect vulnerabilities in WiFi hotspots.
- Automated report generation summarizing detected risks and security posture.
- Performed risk assessment to classify threats and suggest mitigation measures.
- Tech stack: Kali Linux, Aircrack-ng, Kismet, Python scripting, Automated reporting
